

State of Mind Public Review

Metacognitive graph snapshot model with public metrics and section map.

Metrics

- totalNodes
- totalEdges
- protectedCount
- embeddingCoverage
- avgSignificance

Sections

ID	Label	Summary
state-of-mind-metrics	State of Mind	Overall metrics snapshot: total nodes, total edges, protected nodes, embedding coverage, and average significance.
recent-acquisitions	Recent Acquisitions	The five most recently created nodes, used to show what the brain has just learned.
well-worn-paths	Well-Worn Paths	The most traversed edges, used to reveal habitual routes through the graph.
areas-of-focus	Areas of Focus	Categories ranked by node count, used to show where attention and knowledge mass are concentrated.

ID	Label	Summary
center-of-gravity	Center of Gravity	The most central node in the graph, used as a live anchor for the current mind state.
knowledge-distribution	Knowledge Distribution	Node counts by significance tier: low, mid, and high.
